ICCF-holland.org

The ICCF Holland foundation helps children in the poor south of Uganda. AIDS strikes hard here and results in many orphans. If you sponsor a child it will be able to attend school and it will get the help that it needs. With your donation AIDS education is given and a small clinic is kept running. The foundation works with volunteers, 98% of the money is directly for the benefit of the children.

Vim - Vi Improved - is a program to enter and edit plain text. Inspired by the standard Unix text editor Vi it offers the possibility to edit text very efficiently. Especially suitable for programmers and others who often edit plain text. Many features: multi-level undo, syntax highlighting, advanced scripting language, automatic indenting, etc. Works on many platforms: MS-Windows, Unix, Amiga, OS/2, Macintosh, etc. Vim is free and open-source!

www.vim.org

www.A-A-P.org

A-A-P: A new project for software development, distribution and installation. Important part is the A-A-P recipe. This replaces a Makefile and offers many extra features, such as automatic downloading and uploading over the internet, support for CVS and use of signatures. A-A-P is free and open source software.
