The ICCF Holland foundation helps children in the poor south of Uganda. AIDS strikes hard here and results in many orphans. If you sponsor a child it will be able to attend school and it will get the help that it needs. With your donation AIDS education is given and a small clinic is kept running. The foundation works with volunteers, 98% of the money is directly for the benefit of the children.

Vim - Vi Improved - is a program to enter plain text and edit it. Inspired by the standard Unix text editor Vi it offers the possibility to edit text very efficiently. Especially suitable for programmers and others who often edit plain text. Many features: multi-level undo, syntax highlighting, advanced scripting language, automatic indenting, etc. Works on many platforms: MS-Windows, Unix, Amiga, OS/2, Macintosh, etc. Vim is free and open-source!
