Zimbu is a new, experimental programming language. It is a very practical, no-nonsense kind of language. It mixes the good things of many existing languages and avoids their deficiencies. And then throws in a few brand new ideas to make programming more reliable and fun! Zimbu is free and open-source software.

The ICCF Holland foundation helps needy children in the poor south of Uganda. AIDS strikes hard here and results in many orphans. If you sponsor a child it will be able to attend school and get the help that it needs. With your donation AIDS education is given and an essential clinic is kept running. The foundation works with volunteers, 98% of the money is directly for the benefit of the children.
